MAYANK AGRAWAL

Full Stack & Mobile Engineer (React / React Native • Node.js • TypeScript)
Bangalore, India | +91 9340861338 | agrawalmayank1111@gmail.com | linkedin.com/in/mayank-agrawal-532967192 | github.com/Magraa

PROFESSIONAL SUMMARY

Product-minded Full Stack & Mobile Engineer with an **Integrated B.Tech + MBA** from **ABV-IIITM Gwalior**. Hands-on experience architecting and shipping responsive web and cross-platform mobile applications using **React / React Native**, **TypeScript**, **Next.js**, and **Node.js**. Strong technical ownership spanning fluid 60fps frontend UI/UX, robust RESTful APIs, and cloud infrastructure. Passionate about 0-to-1 startup development, rapid feature prototyping, and translating founder vision into production-ready software.

TECHNICAL SKILLS & CORE COMPETENCIES

Mobile & Frontend: React Native, React.js, Next.js, TypeScript, JavaScript (ES6+), Redux / Zustand, Tailwind CSS, Native Android (Kotlin).
Backend & APIs: Node.js, Express.js, RESTful APIs, Python, WebSockets, Authentication (JWT/OAuth), Cloud Functions.
Databases & Cloud: PostgreSQL, Supabase, Firebase / Firestore, MongoDB, AWS (EC2/S3), Docker, Git & GitHub Actions.
Product Leadership: 0-to-1 Architecture, Rapid Prototyping, Component Reusability, Performance Profiling, Business & Tech Alignment.

WORK EXPERIENCE

Bittern Technologies — Full Stack & Mobile Developer — Apr 2024 – Present

- Architected and developed scalable frontend components and cross-platform UI screens using **React / React Native**, TypeScript, and modern styling libraries.
- Designed and optimized high-performance **RESTful APIs and backend services** using Node.js, Express, and cloud infrastructure, cutting latency by **35%**.
- Engineered robust state management and offline-first caching patterns, ensuring smooth 60fps mobile transitions and responsive user interactions.
- Spearheaded product features end-to-end: collaborated on wireframes, implemented pixel-perfect UI, integrated APIs, and deployed production builds.

Logical Analytics — Software Engineer Intern — Sep 2023 – Dec 2023

- Engineered modular, responsive web dashboards and reusable component libraries using **React.js** and SCSS.
- Designed backend schemas and REST APIs using **Node.js** and MongoDB; integrated Cloudinary media pipelines, reducing asset payload by **30%**.
- Conducted code reviews, debugged UI edge cases, and improved page rendering speeds across mobile and desktop viewports.

Blockchain & Automation Startup — Software & Automation Developer — Nov 2022 – Feb 2023

- Built automation bots and client-facing interfaces with custom licensing validation and real-time event streaming.
- Implemented automated tests and data validation scripts to guarantee system stability and prevent duplicate client actions.

FEATURED PRODUCTION & MOBILE PROJECTS

Mr. Proper Platform — Full-Stack E-Commerce & Retailer Portal — mrproper.in | github.com/Magraa/Mr-Proper-Website

- Built production full-stack platform using **Next.js**, **TypeScript**, Tailwind CSS, and Firebase/Supabase.
- Implemented B2B retailer portal, field CRM (partner ledgers, GPS visit logs, digital POD signatures), and Razorpay payments.
- Engineered ERP manufacturing console automating formula batching and inventory deduction; optimized Lighthouse performance to 95+.

Couple Trust — Native Mobile App Architecture — github.com/Magraa/coupletrust-app

- Engineered native Android mobile application with Clean Architecture + MVVM, Kotlin, and Firestore security rules.
- Built fluid gesture-driven UI components, reactive state flows, and secure revocable consent logic for mutual mobile transparency.

FinAudit AI — Financial Intelligence & Fraud Audit Suite — github.com/Magraa/FinAudit-AI

- Built multimodal financial intelligence platform using Next.js 15, Python, Supabase, and OCR + LLM document extraction.
- Engineered automated duplicate detection algorithms and real-time dispute dashboards for high-volume merchant operations.

EDUCATION

ABV-IIITM Gwalior (Institute of National Importance) — 2019 – 2024
Integrated B.Tech + MBA in Information Technology

ACHIEVEMENTS & CERTIFICATIONS

- **Coding & Hackathons:** Solved 300+ DSA problems across platforms | Pre-finalist at Hacksagon Hackathon.
- **Open Source & Certs:** Contributor to Hacktoberfest ('19, '21, '22) | Udemy Complete Web Development Bootcamp.
